*Rand article from wiki

Production Main article: Filmmaking At its core, the means to produce a film depend on the content the filmmaker wishes to show, and the apparatus for displaying it: the zoetrope merely requires a series of images on a strip of paper. Film production can, therefore, take as little as one person with a camera or even without a camera, as in Stan Brakhages 1963 film *Mothlight*, or thousands of actors, extras, and crew members for a live-action, feature-length epic. The necessary steps for almost any film can be boiled down to conception,

planning, execution, revision, and distribution. The more involved the production, the more significant each of the steps becomes. In a typical production cycle of a Hollywood-style film, these main stages are defined as development, pre-production, production, post-production and distribution. This production cycle usually takes three years. The first year is taken up with development. The second year comprises preproduction and production. The third year, post-production and distribution. The bigger the production, the more resources it takes, and the more important financing becomes most feature films are artistic works from the creators perspective e.g., film director, cinematographer, screenwriter and for-profit business entities for the production companies.

Distribution Main articles: Film distribution and Film release. Film distribution is the process through which a film is made available for viewing by an audience. This is normally the task of a professional film distributor, who would determine the marketing strategy of the film, the media by which a film is to be exhibited or made available for viewing, and may set the release date and other matters. The film may be exhibited directly to the public either through a movie theater historically the main way films were distributed or television for personal home viewing including on DVD-Video or Blu-ray Disc, video-on-demand, online downloading, television programs through broadcast syndication etc.. Other ways of distributing a film include rental or personal purchase of the film in a variety of media and formats, such as VHS tape or DVD, or Internet downloading or streaming using a computer.

The Association of Independent Commercial Producers AICP released a set of guidelines and work place practices in early-May 2020 as restrictions began to lift across the U.S. This set included specific guidelines for all departments and worksites involved in productions.¹⁶⁶¹⁶⁷ An industry task force of studios and unions submitted a report on June 1, 2020, with various recommendations on health and safety guidelines for cast and crew of productions. These guidelines include regular testing, wearing face coverings at all times when not filming, actors practicing social distancing whenever possible, reducing or modifying scenes involving close contact, and recommending that casting be performed via videoconferencing or self-recorded video rather than in-person.¹⁶⁸¹⁶⁹
